PATIENT INFORMATION

LIFT YOUR SMILE[®]

THE WORLD OF *Authentic™*

Authentic™ is a pressable ceramic system that allows for restoring shape and colour corrections of teeth in a simple and effective way. With its colour system even the lightest shades appear perfectly natural. Even discoloured or overly bleached teeth can be masked. Your dentist will be happy to advise you on all the aspects of treatment.

Authentic™

The mouth composes as much for the impression of beauty as the eyes do:
A smile can say a thousand words,
and is undeniably the way we show
our teeth!

- ▶ It has become highly fashionable to visit the dentist for the creation of a new and more attractive smile. Dentists are specializing in smiles with cosmetic and restorative procedures like veneers and full porcelain crowns. Cosmetic dentistry is the beauty enhancement to create seductive smiles and better overall looks. Just by making subtle changes it can mean a much more dramatic effect on your smile and personality!

IN-OFFICE TREATMENT

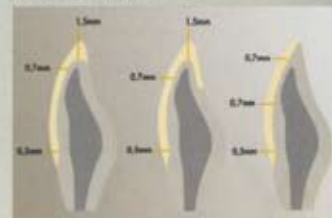

- ▶ When porcelain veneers are the choice for both patient and dentist, very little tooth structure is removed in most cases. First the dentist reduces the enamel or outer layer of the tooth. The porcelain veneer will replace this small amount of tooth structure. The patient will be advised by the dentist and possibly the dental technician fabricating the restorations, so that only the highest esthetic standards are met. Afterwards these will be bonded to the tooth structure in the dentist's surgery. With porcelain veneers there is a chemical bond between tooth and the ceramic veneer. Although very little tooth material is reduced, this method will produce a highly esthetic and durable restoration.
